THE SERVICE GARAGE.

We have an important announcement to make to our many Friends and Patrons, which we believe will prove interesting and at the same time, beneficial to all. On and after November 1st, 1930, we are going on a strictly Cash Basis. All Parts, Accessories, Gas, Oil and Grease and Labor will be sold for Cash only. We feel that by doing business on this basis we will be enabled to buy your requirements cheaper, thereby passing on the benefits to our Customers.

We are convinced that a distinct saving will be provided for you, and feel sure that this partnership between us will prove advantageous to all.

This plan does not include the purchase of New or Used Cars. We have a very liberal offer to make on Cars whereby they can be purchased on a deferred payment plan.

Call in and let us tell you about it.

Sale of Land on Saturday

A sale of lands will be cried in front of the local Postoffice on Saturday afternoon next. The lands to be offered comprise the NE 12 and E 13, Tp 53, Rg 1 W5, some three miles north of Stony Plain. The sale is by order of the Master in Chambers, and it is understood the sale is for the purpose of settling an estate.

Webber-Henkel

A very pretty wedding took place on Sunday last, Oct. 19, at the Glory Hills Reform church, when Miss Elizabeth Webber (daughter of Mr and Mrs. William Webber) was united in marriage to Mr. Henry Henkel (son of Mr and Mrs. Conrad Henkel). The ceremony was performed by the pastor of the church, Rev. C. H. Reppert.

At the close of the service at the church the bridal party motored to the residence of Mr and Mrs. Conrad Henkel, where they all sat down to a sumptuous repast.

Honoring Miss Marcella Larson.

A very pleasing affair took place on Friday night last, at Holborn, when a number of young friends of Miss Marcella Larson gave her a surprise visit at the residence of her parents, the occasion being a farewell party, in view of the fact that this popular young lady will shortly be leaving the district to reside in Edmonton. Games and dancing helped pass a very enjoyable evening, with a dainty lunch served at midnight.

Among those present were: The Misses Olive and Mildred Liebert, Vera Becker, Marcella Larson, Esther Peters, Velma Chase, Annis Liebert, Susie Miller, Esther Wolfe, Fritz Zorber; Messrs E. Dannbauer, R. Downs, Clarence Singer, R. Sutton, Gus Barish, Val Kulek, Emond Lory, Magnus & Hilma Larson, Walter Peters, E. & Anderson.

Christie's Newest Venture

Mr Christie intends making an innovation the coming cold weather season, and will cater to the boxing fans who frequent his cafeteria. The space now occupied by the private booths will be given over to the knights of the leather to enjoy themselves, and incidentally to afford amusement to onlookers.

Mr Christie has purchased all the necessary equipment—boxing gloves, punching bag, and of course towels and a sponge.

A meeting of the promoters will be held very shortly, and it is expected the boxing bouts will be running on or about Halloween.

On nights other than the set night, those amateurs who wish to practise will be allowed the use of the equipment.

Followers of the manly art of self-defense are assured of many a good night's entertainment the coming winter.

ENO'S FRUIT SALT

Our National Parks

On May 9th of this present year, a Bill to be known as the National Parks Act passed the House of Commons and was shortly afterwards ratified by the Senate and signed by the Governor-General.

This marked the beginning of a new era for the National Parks of Canada. They have now reached that state of importance in the administrative eye which entitles them to a separate Act. Formerly they were simply an afterthought administered under the Dominion Forest Reserve and Parks Act. No longer can they apply be compared with the house which was built upon the sand. The new National Parks Act is the rock upon which will be built a park system of which Canadians for all time will be justly proud, a system which will endure, a system having the stability of a mountain. No longer will the park boundaries and policy of administration fluctuate with the rise and fall of the various political parties in power at Ottawa, because they can never again be made the political policy of any party, but are the policy, propriety and pride of each and every individual Canadian in this broad Dominion.

By the former Act all matters affecting parks were under the direct control of the Minister of the Interior through the Parks Branch, and an order-in-council could without the consent or even the knowledge of Parliament establish new parks, relinquish all or part of the present parks, sell or lease any water power, timber berth, mining claim, or other commercial concession in the boundaries of any park.

By the new Act, thirty days' notice of any such matter affecting the parks must be published in the Canada Gazette, and then the matter takes the form of a private bill and may be thoroughly discussed by the people's representatives in Parliament before becoming law. Surely a far better way of dealing with park areas which belong not to any individual community or province but to the people of Canada as a nation.

It is well that such protection has been thrown around our great and expanding system of National Parks, because as population increases and the country becomes more and more industrialized, efforts to secure portions of National Parks areas for purposes of commercial exploitation become more numerous and harder to resist. Yet they must be resisted if the beauty, and therefore the value, of our National Parks is not to be destroyed.

Once embark on a recognized policy of alienating water-powers in our National Parks for commercial purposes and a precedent is established which will be cited by other interests. Our National Parks are rich in forests. With the waters and mountains they constitute the beauty of the parks; without them there would be little or no water. But the lumbering interests look upon them with envious eyes, and if the water-powers are to be exploited by the hydro companies, why not the forests by the lumbering interests?

So, too, some of the National Parks areas are believed to be rich in minerals, but what would become of these parks if unsightly mining camps, with their piles of refuse, old derricks, ugly mine buildings, and all that is inseparable from mining camps and towns were allowed to spring up within their borders?

But if the door is opened to commercial exploitation in one direction, it will be well-nigh impossible to stop it in other directions.

The water-powers, the forests and the minerals within our National Parks undoubtedly have a commercial value, but so, too, have the Parks themselves in their natural state of beauty. Commercial exploitation of the forests would in a few years lessen and in time destroy their value. Cutting of the trees would lower and ultimately destroy the lakes, rivers and waterfalls. Mining operations in time would exhaust the minerals. Commercial intrusions in the National Parks would mean a gradual depreciation in values.

Retention of our National Parks in all their natural beauty will add to their commercial value as magnets which will attract ever increasing numbers of tourists from all parts of the world, while maintaining for Canadians of future generations the delights and benefits of great national playgrounds, places of inspiration, and of health-giving happiness.

It is well, therefore, that the new National Parks Act has become the law of Canada. In this Dominion, as in the United States, we must face the fact that commercial interests are the peril of our National Parks system. With almighty dollar, declared by Washington Irving to be the American god, is the outwitting deity. The struggle is between the lower and the higher, the sordid and the ideal.

Speaking for the then president of the United States at the annual opening of the Yellowstone National Park in 1923, Dr. John Wesley Hill said: "Regardless of all facts and figures, arguments, appeals and plans any plan however meritorious on its face for the commercial exploitation of parks must by the very nature of its aims and purposes be immediately doomed to failure." Good projects, bad projects, indigent projects, all must face the same fate, for it is the established policy of the Government that our national parks must and shall forever be maintained in absolute, unimpairment form, not only for the present, but for all time to come. This fixed policy will not be swayed a hair's breadth by any influence, financial, political or otherwise. If rights are granted to one claimant, others must follow, so a precedent must not be established. It would inevitably ruin the entire National Parks system."

Canada can do so long, and if any attempt is made, no matter in what guise, to infringe upon the rights of all the people in their National Parks, it they should arise in their might and end any such attempt. The power is now in their hands by virtue of the new National Parks Act.

Seek Lower Rate On Cattle Shipments

Negotiation For Decrease In Transportation Charges On Exports To Britain

Mrs. Robert Weir, Minister of Agriculture, is in negotiation with the Atlantic shipping companies and the railways in an effort to obtain a decrease in the transportation charges on cattle exported to Great Britain, which will open up this market to large scale shipments from western Canada.

The negotiations have not proceeded far enough to warrant any forecast of results. Mr. Weir, however, has got to the point where he is advocating an entirely new policy, endeavoring to change the whole basis upon which rates have been imposed in the past.

In regard to the ocean rate, Mr. Weir is endeavoring to have the whole rate basis changed. He wants shipping companies to quote rates by the ton instead of by the head. Such an arrangement would give shippers advantages in shipping stock of various weights. A definite decision in this regard will be reached before long.

When Languid And Anaemic

When a girl is languid, dull and irritable; when her color fades you may be sure her blood is impoverished. When a girl is poor her nerves are starved and there is serious danger of a decline. Rebuild the blood, strengthen the nerves and good health will follow.

Dr. Williams' Pink Pills are of untold value as a blood-builder. Concerning them Mrs. John Finn, Howland Station, P.E.I., says: "My daughter was badly run down; pale, nervous and under weight. We decided to give her Dr. Williams' Pink Pills. After a few boxes she gained in weight, her appetite improved and color came to her cheeks. She has fully regained her former good health."

You can get these Pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

For Underwater Safety

Invention Ensures Escape From Submarines At Great Depth

R. H. Davis has perfected an invention which will enable escape from submarines far under the sea. The invention consists of a breathing bag which is supplied oxygen by a small cylinder of oxygen fixed below it. Poisonous carbonic acid gas of the exhaled breath is absorbed by a cartridge of soda lime. A special suit containing the breathing apparatus is donned in case of danger under water. It has been tested at a great depth.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed, and satisfactory growth is assured.

New Aircraft Engine

A revolutionary type of aircraft has been developed in South Africa. The weight of the engine per horse-power is said to be from a quarter to a third less than that of other engines. It is said to have no rods, crank-shaft, shaft reduction gear or timing gear, and that there are only one-sixth the usual number of parts.

Relieves Asthma At Little Expense. Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

A Garden Of Sorts

He had been to the manager's office to ask him for the day off so that he could dig up his garden.

"But, my good man," said the manager, "Jones told me only the other day that you hadn't got a garden."

"Well, someone must have taken it off the window-sill," was the calm reply.

Minaird's Lintiment adds tired foot.

Vast Sodium Sulphate Deposits Located In Saskatchewan One Of Richest In The World

A survey conducted by Dominion Government experts has revealed that Saskatchewan possesses one of the greatest deposits of sodium sulphate in the world, according to a bulletin issued by the provincial bureau of publications. It is further stated that exploration of these deposits is now well advanced and present indications are that they are a potential source of wealth to the province.

It was stated by an official of the bureau of publications that the company engaged in the preparation of the sodium sulphate found in Horse-shoe Lake is employing local labor almost exclusively. The payroll of the firm amounts to \$7,000 each month, it was said, and the amount is distributed in an area where the crops for the past two seasons have been extremely light.

The statement as issued by the bureau of publications is as follows: "The alkali lakes of Saskatchewan, which in days gone by were only considered as 'salt licks' for cattle are unquestionably designed to be a source of considerable wealth to the province in the near future."

"For many years these deposits were referred to rather contemptuously as 'alkali' or 'stink' lakes, and were not even considered worthy of investigation. As a rule vegetation did not flourish in their vicinity, and their only visitors were the range stock that, urged by some primitive instinct, came to lick the crystals, which science now declares to possess considerable veterinary virtue."

"During the war when an Empire-wide search was being conducted for nitrates, these deposits came under the expert eyes of science, and it was discovered that some of them contained vast quantities of sodium sulphate of remarkable quality."

"A survey of some of these Western beds, conducted a few years ago by members of the Dominion Geological Survey, indicated that Saskatchewan possesses a considerable portion of the world's supply, and for the first time in the history of the province definite information was obtained in respect to this valuable natural resource."

Sodium sulphate deposits occur in the beds of lakes that in the past have been designated as 'alkali.' Sometimes these lakes are practically dry, and sometimes there is a surface of water, seldom deep, and varying according to the season, covering the material. The usual condition is shallow water in spring and early summer, which disappears as the season advances by evaporation and incorporation with the sodium sulphate. When there is no water present, the surface presents the appearance of glass ice, but is much harder."

"To a stranger approaching one of these lakes during the summer, the condition he witnesses may well make him doubt the evidence of his senses. Here is a lake during the warmest portion of the year apparently frozen solid. So remarkable is the similitude, that it requires a close examination to dispell the illusion. In certain places about the deposits, dark, evil smelling springs well up from the nether depths, and it is a popularly accepted theory that they contain the chemical that forms the sodium sulphate."

"The beds of this material may be shallow or of great depth. In one extensive deposit the crystal deposit has a depth of nearly 140 feet. In some cases there may be slight layers of mud or vegetable deposit, but on the whole they are remarkably clean."

"Under normal conditions the sulphate deposit contains a large per-

centage of moisture, often 50 per cent., and in the past the chief process for obtaining the sulphate was to evaporate the product was to evolve a process of dehydrating it economically and in commercial quantities."

"Sodium sulphate is an essential in certain industries, and a valuable adjunct of others. It is an essential in the manufacture of kraft paper from pulp wood, and is regarded as the ideal digestant in all kinds of pulp manufacture. It is used extensively in dye works, textile manufacturing, leaded glass, tanning, photographic supplies, and is the basis of many veterinary remedies. Lately it has been found that sodium sulphate is a valuable agent in the refining of nickel, and it is understood that there may be a considerable demand for it in connection with other metal processes."

"In the past most of the sodium sulphate used in Canada, chiefly in connection with the kraft paper industry, has been a synthetic material made from the by-products of hydrochloric and sulphuric acid manufacture. This synthetic sodium sulphate was manufactured at American chemical centres such as Pittsburgh, Cincinnati and Philadelphia and imported into Canada free of all duty. Owing to the short railway haul and other favorable conditions in the past, the natural product of Saskatchewan was unable to compete with it."

"Recently, however, a complete change has taken place that is bound to benefit the sodium sulphate industry in Saskatchewan. A new process has come into use in connection with the manufacture of these acids that leaves no residue and the economical manufacture of synthetic sodium sulphate has, almost overnight, become a thing of the past. Chemical engineers declare that it is doubtful if there is now any of the nitre cake used as a base for the synthetic product to be had nearer than Chile in South America. Furthermore the demand for sodium sulphate for the treatment of ores can hardly fail to exercise a stimulating effect upon the whole country."

"The problem of successfully drying, or dehydrating the material has been completely solved. A new mining company, which during the last year has erected a large plant at the rate of about 100 tons per day. This concern has already shipped about 7,000 tons to the great nickel works near Sudbury, Ont., where they have apparently found that they are at present the only total output. Another company operating at Dunkirk, also in southern Saskatchewan, is drying and shipping in considerable quantity. A large demand seems to be springing up, and there is little doubt that this industry will have the effect of adding materially to the wealth of the province."

Helped With Problems

Canadian Farmers Receive Many Publications and Circulars Free Of Charge

The Department of Agriculture at Ottawa through its Publications Branch last year distributed to farmers all over Canada free of charge a total of 4,361,570 publications, bulletins, circulars and reports. In addition to this material 266 press articles and 198 magazine features were supplied. This is one of the ways in which the farmer is helped with his problems and kept in close touch with the condition of his markets and important new developments in agriculture.

Made Trip In Style

Phoning the railway, at Memphis, Tenn., a negro representing himself as the assistant superintendent of the Pullman Company, ordered a car to be attached to a certain train going to St. Louis. It was to be locked and a porter would go too. The car was coupled with the train. A negro who represented himself as a porter got aboard, rode to St. Louis and left the train at Union Station before his deception had been discovered.

Before Marriage: Spinning around. After: Forking over.

Debt Adjusting Plan

Saskatchewan Sheriffs Will Co-Operate With Committee

Letters have been sent to each of the 300 governing bodies of the rural municipalities of Saskatchewan advising them that the sheriffs of the province will co-operate with the debt adjusting commission in referring all cases in which arbitration between debtors and creditors is asked for, to the commissioner, it was stated by Hon. Howard McConnell, Minister of Municipal Affairs.

It was further indicated that the municipalities had been asked to report all cases needing this assistance to the sheriff.

This action has arisen out of the meeting of the special committee of creditors and debtors, which was held recently at the parliament buildings, Regina. Following this meeting, at which representatives of various retail businesses, financial institutions, the United Farmers of Canada, Saskatchewan section, and the wheat pool were present, it was recommended that the sheriffs be asked to assist in matters of debt adjustment.

The special committee was called as a result of representations to the government by the United Farmers of Canada that the creditor groups were, in many cases, pressing unduly for payment and that a condition of financial stress existed among the farmers of the province.

Soybean Becoming a Valuable Product

When Oil Is Extracted Residue Makes Good Stock Feed

A chemical analysis of soybean varieties being developed and tested by the agronomists of the Dominion Department of Agriculture show a very close relation between protein and fat content in the soybean. The correlation is fairly constant. The greater the amount of fat or oil in the bean the lower the protein content and vice versa.

This is a development of special interest at the present time, in view of the fact that the commercial value of the soybean crop depends directly on the market price obtaining for oil or protein respectively. In tests of some twenty-five varieties grown at Ottawa, and eighteen grown at Harrow, Ontario, protein content ranges from 40.82 per cent. to 46.06 per cent. with the fat content ranging from 20.18 per cent. to 15.18 per cent. respectively are reported.

The soybean has two commercial uses, the production of soybean oil, and the use of the residue in the form of soybean meal or cake which makes a valuable live stock feed.

In the first eight months of this year 36,565,000 pounds of lobsters have been caught in the Atlantic coastal waters of Canada. This is an increase of nearly 3,000,000 pounds over the catch in the corresponding period last year.

Minister Of Railways Says Work At Port Churchill Is Months Ahead Of Schedule

Ontario Walnuts Best

Kent County Famous For High Grade Products

For walnuts, Kent County, Ontario, long famous for a variety of high grade farm and orchard products, claims to be in the front rank. This was proven recently at the Nut Growers' Conference held at Cedar Rapids, Iowa, when an exhibit of Japanese walnuts grown by Harold English, whose farm is close to Chatham, was declared the best ever seen by those in attendance at the Conference. Large size, good cracking, extraction quality, and fine flavour were the points on which the experts based their decision. The tree from which these fine nuts came is a beautiful specimen and has made very rapid growth. It is only six years old and has borne two good crops.

Saskatchewan Milk Pool

Creamery Plant To Be Erected At Saskatoon

Starting a little more than three years ago with no assets, the Saskatchewan Milk Pool, which now has assets of \$75,000, will enter the creamery business. A large plant will be erected at Saskatoon shortly to take care of expanding interests, officials announced recently.

To date, the Milk Pool has handled only shipments of whole milk, preparing the surplus for sale as cream and milk powder. During the last year 16,500,000 pounds of milk, valued at \$425,000, were handled. The Pool is a purely co-operative organization with Saskatoon district farmers as directors.

Manitoba Poultry

Exhibit At World's Poultry Show In London, England, Attracts Attention

Three birds exhibited by W. H. Shepherd, of St. Vital, a suburb of Manitoba, at the recent exhibition of the world's Poultry Congress in London, England, and which were bid in at the public auction following the show, for the royal farms of Yugoslavia, have resulted in a further order from the same farms for 26 more birds.

Western Wheat For Foreign Ports

According to figures prepared by the Merchants Exchange of Vancouver, Western Canada has been supplying the South American Republic of Colombia with about 20,000 tons of grain each year for the past five years. The largest cargo of wheat ever shipped from Vancouver left for Shanghai the other day, carrying more than 450,000 bushels.

AUTOGIRO AEROPLANE

The great inventor, Thomas A. Edison, with James Ray, vice-president of the Pitcairn plant, standing beside one of the autogiro aeroplanes of the company, which was flown for his benefit.

Back from a flying inspection trip of Hudson Bay Railway and Churchill, Hon. R. J. Manion, Minister of Railways and Canals, expressed keen satisfaction with the progress of the work.

"Unless something very unforeseen or unexpected happens," Dr. Manion declared, "we will be able to open Churchill for test shipments next September. The railway is in shape right to Churchill and I was most impressed with Churchill harbor, as, when properly dredged, it can hold an immense fleet."

"There remains a good deal of work in regard to the arranging of insurance rates, chartering vessels and matters of that nature, but steps are being taken well in advance to see that nothing is overlooked."

"While I have never visited Port Nelson, I have had reports on it, and it is my opinion that Churchill was a very wise choice as the terminal, possessing a natural harbor with some dredging required." As to the future of Churchill as a shipping port, of course, time and experience of the route alone will tell, but many are most optimistic about Churchill becoming one of the most important ports."

Approximately half of the deep water main dock is completed, Dr. Manion stated, months ahead of schedule. The dock would be completed, including filling, before the end of 1931. With respect to dredging, Dr. Manion said that 50 per cent. of the work had been performed, while a similar percentage of the filling had been done. The water supply problem, of a difficult and unusual character, had been apparently solved, the minister declared. Three-quarters of the work in this regard, he continued, had been performed and this particular task would be completed next year.

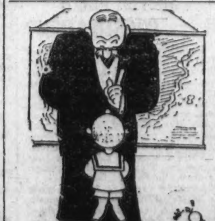

Questioned with respect to the huge elevator under construction at Churchill town, Dr. Manion stated that progress was being made in accordance with the schedule. The main elevator contract provided for completion not later than September 15, 1931. Dr. Manion explained, with a penalty of default of \$1,000 per day. Contracts for 3,600 kilowatt power houses, the minister said, call for completion not later than September next, with a penalty clause for any default.

"With an elevator of practically continuous capacity of 40,000 bushels per hour," the minister declared, "it should not be difficult to load one average tramp boat per day, to be increased to three boats when the dock and all grain conveyers are completed."

Dr. Manion was accompanied on his trip by his deputy, V. I. Smart, Col. A. E. Dubuc, chief engineer of the department; C. D. Howe, of C. D. Howe & Co., designing engineers; Vice President Warren, of the western division, Canadian National Railways and officials of the system.

No Getting Out Of It

News has reached Berlin that Polish people must take a bath at least once a month whether they need it or not. The Polish government is introducing a law under which every inhabitant of the country will be compelled to take at least one bath a month. What is more, he must have a card stamped to prove it.

"What are the four elements?" "Water, earth, air, and fire." "Come, what causes all the accidents?" "Motor cars."—Buen Humor, Madrid.

Client: "Are you sure this life belt will support me?" Salesman: "Quite, and if it should fail you will get your money back."—Abit for Alls, Stockholm.

Make dresses bright as new!

DIAMOND DYES are easy to use, go on smoothly and evenly; **NEW.** Never a trace of that dyed look when Diamond Dyes are used. Just true, even, new colors that hold their own through the hardest wear and washing.

Diamond Dyes owe their superiority to the abundance of pure anilines they contain. Cost more to make. Surely, But you pay no more for them. All drug stores—15c.

Diamond Dyes
Highest Quality for 50 Years

WORLD HAPPENINGS BRIEFLY TOLD

Alexander Harrison, of Philadelphia, one of the most noted United States painters, died recently after a long illness, in his Paris studio. He was 67 years old.

The U.S. weather bureau will issue fire warnings from a radio station near Madison, Wis., during the hazy season, it has been announced by the state department of agriculture.

Medicine Hat statistics show that only 210 dwellings in the municipality are occupied by tenants, the balance all being owned by occupants, thus establishing most unique Canadian record.

Plans to hold a re-union of the families and descendants of all former Presidents of the United States at the capital is being fostered in connection with the 1932 Washington bi-centennial programme.

Canada will produce 45,260,000 hundredweight of potatoes this year, according to a forecast made by the Dominion Bureau of Statistics. Last year Canada's crop was 39,930,000 cwt.

Prohibition of advertising of hard liquor in Manitoba has been ordered by the Manitoba liquor control commission. In future, no advertisements will be approved by the board. The ban has been in effect since the beginning of October.

The association of South African Chambers of Commerce, in their annual congress, urged the government of South Africa to pursue a policy of intensive development of trade with the countries of the British Commonwealth.

Discovery of a Socialist bomb plot against the life of Marshal Joseph Pilsudski, premier of Poland, was announced by the semi-official Iskra Agency, and eight members of the Polish Socialist Party were arrested at Warsaw and accused of preparing the plot.

Persian Balm — the unrivaled toilet requisite. Essential to every daily woman. Imparts rare charm and beauty to the complexion. Softens and beautifies the skin. Makes hair flawlessly white. Cools and refreshes. Relieves roughness. Ideal for true feminine distinction. Delicately fragrant. Swiftly absorbed into the tissues, leaving no stickiness. Persian Balm invariably creates a subtle elegance and charm.

Manitoba Stone For Edmonton
The final shipment of Tyndal stone, from the Tyndal quarry in Manitoba, for Edmonton in connection with the \$250,000 contract for the Alberta Provincial Buildings at Edmonton, has been made ahead of schedule.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Delicately contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and grip and leave a degraded after effect.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red packages.

Finds Use For Muskeg

May Establish Industry To Produce Insulating Material

An American company with headquarters at Minneapolis, is investigating commercial uses for the northern muskeg with a view of establishing an industry to produce insulation material. While the prospect of using muskeg as an insulating material is something new to the majority of citizens of Canada, it is an old trick of the veteran prospectors in this area.

But hundreds of log cabins of trappers and prospectors in the northern areas of Manitoba and Saskatchewan have been packed with the bog material for years, keeping out both the freezing blasts of the northern winds and the burning sun of northern Manitoba to the entire satisfaction of the owner of the cabin.

No local information can be obtained regarding the investigations by the American firm of the insulating use of muskeg, but early in the spring a substantial shipment of the muskeg left here for the south.

(By Eva Tingey).

PRETTILY DRAPED

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Delightful, draped effects mark many of the new bodice and skirt effects, giving almost Greek grace to the vogueish dresses.

The model illustrated for today's pattern has a new and charming collar. It forms a pretty drape on one side and is caught with a modern brooch or button, preferably a jeweled one if the material is rich like satin, crepe-de-chine, marocain, chiffon velvet, etc. The model would also cut charmingly in a facemé velvet of which some lovely new designs are to be seen.

To be in keeping with the bodice trim, the skirt drapes prettily on one side where the weight of the fullness of stuff just causes the merest dip at the point. The belt is narrow and of self tissue.

This pattern may be obtained in sizes 14 to 20 and 34 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamp or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Cascarets 10c "THEY WORK WHILE YOU SLEEP"

Should Check Up Unemployed

Some May Not Be Deserving Of Government Relief

Unemployment figures in urban centres are augmented each winter through the migration of men who work steadily on farms in the summer and rather than accept a smaller wage for the winter months or perhaps merely comfortable board they journeyed cityward in the hope of sharing in the jobs handed out by benevolent city councils. Urban municipalities should keep a close check on these migrants and refuse to increase the burden upon them and municipalities and the country at large by maintaining these men in semi-idleness for five months out of the year.

It will be grossly unfair to taxpayers everywhere if part of the twenty million dollars appropriated by the Dominion Government and the thousands of dollars that are added to it by the provinces and municipalities is used to maintain the migratory class of laborer who has been offered winter employment and turns it down in order to share in the millions voted for unemployment relief.—Farmer's Advocate.

Recipes For This Week

(By Betty Barclay)

SCALLOPED TOMATOES

Drain one can tomatoes from some of their liquor. Season with salt, pepper, a few drops of onion juice, and 2 teaspoons sugar. Cover the bottom of a buttered baking dish with buttered bread crumbs, cover with tomatoes, and sprinkle top thickly with buttered crumbs. Bake in a hot oven until crumbs are brown.

LEMON TAPIOCA SHERBET WITHOUT FREEZING

½ cup quick-cooking tapioca.
1 cup sugar.
2 cups water.
Juice 2 lemons.
2 egg whites.
Put tapioca, sugar and water into double boiler, and cook, stirring often, until clear. Three minutes before removing from fire, add lemon juice. When cool and beginning to thicken, add the stiffly-beaten egg whites, and beat well. Serve with boiled custard or heavy cream.

Douglas' Egyptian Liniment is without a rival. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning.

Less Crime in Britain

Several Prisons Are Closed For Lack Of Occupants

Crime in Great Britain has deteriorated so much that prisons are operating far below capacity, and several have been actually closed for lack of occupants, states Dr. Higgins, medical officer of the prison in Liverpool, who arrived in New York recently.

He attributed the decrease in crime to the system of swift justice, strict laws, requiring the closing of saloons at certain hours, and to the fact that a prisoner of a person fined for an offence is kept under close surveillance after his release or payment of the fine.

SUNDAY SCHOOL LESSON

OCTOBER 26

WORLD'S TEMPERANCE SUNDAY —SPIRITUAL WEAPONS IN A WORLD WAR

Golden Text: "Every man that striveth in the games exerciseth self-control in all things."—Corinthians 9:25.

Lesson: Galatians 5:13-26. Devotional Reading: Romans 14:13-21.

Explanations and Comments

Christian Freedom, verse 13.—"Brethren," wrote Paul to the Galatians, "you are free from the Law, but Christian freedom does not mean that you can do as you please." Liberty and license are not synonymous. Do not use your freedom as a license for indulging your lower impulses, but serve one another in love. "Flesh" is used here for "that element of man's nature which is opposed to goodness and makes for evil. It signifies the entire potency of sin."

The Christian Love, verses 14, 15. Through loving service for others, you fulfil the whole divine law, which is, "Thou shalt love thy neighbor as thyself." Paul here quotes Leviticus 19:18. Then, recalling the fact that the Galatians were prone to quarrel, Paul adds, "But if ye hate one another like dogs or wild beasts, beware lest you destroy one another."

Antagonistic Spirits, verses 16-18. Submit to the guidance of the Holy Spirit in all your acts, Paul counsels, and then you will not fulfil the desire of your evil nature, for the evil nature and the Holy Spirit are antagonistic. The Spirit strives to prevent your obeying your evil nature, and your evil nature strives to hinder you from obeying the Spirit, for they are at warfare one with the other, and prevent your doing what you would. "Paul's theory seems to be this: Man's glory lies in his will. In him, however, are two hostile forces. The flesh seeks ascendancy, urging him to choose the things he likes. The Spirit urges him to unite himself with God and things divine, to use his will to govern his life according to spiritual motives."

The Final Conflict, verses 25, 26.—"We are by the Spirit, by the Spirit let us walk. Walking by the Spirit is the effect of living by the Spirit. If the Divine Spirit has control of our spirit, then we are living righteously."

Build Big Bridge

Structure Over One Thousand Feet In Length Being Erected At Peace, Alberta

Work on the steel superstructure of the new traffic bridge across the Saskatchewan River at Brosseau, Alberta, which is being built by the Department of Public Works, has begun. The bridge is the largest that the department has built for several years, and will be one of the largest in the province, running to something over a thousand feet in length.

An Oil Of Merit. —Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will convince you to any who doubt its power to repair and heal.

Starts Mystery Flight

Great Secret Surrounds Destination Of British Woman Aviator

Mrs. Victor Bruce, British woman aviator, has started from Heston, Middlesex, air park, on a mysterious flight in her single-seater Bluebird aeroplane.

The greatest secret surrounded her destination. One report credited her with the intention of flying east across Europe to Persia, India, China, and Japan. Another said that she was flying to Alexandria and then down to Cape Town.

There was still another report that said she was flying around the world and would be gone three years.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

Started In Small Way The dahlia began its spectacular career most modestly in 1970 when a few seeds were sent from Mexico to Madrid. By 1841 some 1,200 varieties had sprung from this little packet of seeds. (not bulbs)—a truly remarkable example," says Dr. Howe "of a plant's capacity for variation when aided by man." Today more than 8,000 varieties are in cultivation, thousands have been discarded and there is a dahlia society in every state.

Stony Plain and District

Mr and Mrs L M Larson made a motor trip to friends at Haldron on Sunday.

George Koebel is back in Stony, from a four-month trip to Toronto and other good Eastern towns.

Brant's Lake has been well patronised the past week by local skaters, whilst awaiting the opening of their rink in town.

The new junior at the local branch of the Canadian Bank of Commerce is Mr R S Sutton, of Edmonton.

At the sitting of the District Court in Stony Plain yesterday the case of McCulla v. Smalchartz, for damage to a car, was adjourned to Thurs. Nov. 6, in Edmonton.

Inspector B Lea, of the Provincial Fire Marshal's office, paid Stony Plain's business places a visit this week. On Monday evening a special meeting of the town council was called, at which recommendations made by Mr Lea were discussed.

Hardwick's General shipped another car of potatoes west yesterday.

The annual bazaar and chicken supper at Moose Hall last evening, under the auspices of the Stony Plain and Spruce Grove R. C. Parishes, was well attended. The supper was a delicious affair.

The All Nations Supper held in the United Church on Saturday last was a unique affair, and drew a goodly crowd.

For Lovers of Good Music.

Local lovers of good music are having a treat these evenings listening to the concerts coming thru the newly installed, radio machine at the Royal Cafe. The new installation is a Sparten, which Mr Larson has purchased from Mr E H Pidgeon, agent for this district.

Railway Time Table

Going East—Every morning at 6.23. Every Monday, Wed. and Friday at 7.01.

Going West—Sun., Tues. and Friday at 13.28; every midnight at 24.13.

Betray—Came to my place last May, 1 Red Road Mooley Heifer, or 2 years old, no brand. A V Carter, Stony Plain. 33np

Pawlyk versus Pawlyk

The legal battle between Luc Pawlyk and John Pawlyk of Carvel district, was again before the courts last Wednesday, in Edmonton. Luc Pawlyk, under the execution held by him, seized the crop of John Pawlyk, which crop was claimed by John's wife. As a result, an interpleader was ordered, and the matter came up before His Honor Judge Crawford. The Judge decided that the crop belonged to John, and could be sold to satisfy the claims of Luc Pawlyk. As the case centred on a highly technical legal argument, it will likely go to the Appeal Court. George J Bryan appeared for the plaintiff, Luc Pawlyk; while H A Mackie, K.C., appeared for the claimant, Mary Pawlyk.

Tilson—Anderson.

On Wednesday, Oct. 15th, at the Lamont United church, Miss Hazel Merle Anderson (daughter of Mr and Mrs Samuel Anderson, Lamont) became the bride of Mr Frederick Lemmon Tilson of Stony Plain.

While Miss Thelma Anderson played the "Wedding March" the bride, charming in a pale pinkorgette, and becoming black picture hat, entered on the arm of her father, attended by her sisters, Miss Verna and Miss Iva Anderson.

Rev J Churchill performed the ceremony. The groomsmen were Mr Steve Holowachuk, of Edmonton University, and Mr O Kettleson of Star. The ushers were Messrs Russell Anderson and Musson Gerex. A goodly array of gifts told something of the popularity of the bridal couple, and the best wishes of the community.

Mr Tilson is principal of the local school. The happy couple came to Stony on Saturday, and were duly serenaded that evening by the Boy Scouts.

Mr and Mrs Tilson have taken up their residence in the house recently vacated by the Alton family.

A Bum Director.

Motorist: "Is it far to the next town?"
Native: "Well, it seems further than it is but it ain't."

Spruce Grove News

Mr Nelson Baruhart has been awarded the contract for carrying the mail on rural route 1, down to Dimer's corner, and starts on the job Oct. 27.

The old timers of this district have received invitations from Secretary McCool to the Old Timers' dance at Memorial Hall tomorrow night. Mr McCool promises this will be the best ever.

Mr Warnick has recovered the five calves advertised lost in last week's Sun. The animals were on the farm of Mr Fuhr.

St Joseph's Parish sent a big delegation to Stony Plain yesterday, where the big bazaar and supper was held.

A construction gang from the Telephone Dept. has been working, this week, on the Baseline, replacing poles bent over in last week's storm.

We see where the little incident of Farmer (censored) who shot two of his calves about three weeks ago, while aiming at a wild animal, has been published in an Edmonton paper. These duties get the news—if you give them time.

Your correspondent has just heard the story being circulated around town of the hotelkeeper and the Scotsman who went fishing, the understanding between them being that whoever caught the first fish was to produce a drink. The two fished for a while, and of course the innkeeper caught the first fish, and had to produce, which he did. When this little incident was over, and they started back to fish, the Scotsman remarked casually: "Well, that's o'er with; so I'm thinking I'll noo jut a wee bit o' bait on my hook!"

Here and There

(624)

After a trip through western Canada during which he and his fellow-directors studied at close range business and agricultural conditions in four western provinces, E. W. Beatty, chairman and president of the Canadian Pacific Railway, recently announced a programme of improvements and extensions to be undertaken forthwith. This work is advanced to the present time from a next year and 1922 and will furnish work for farmers and their work animals and absorb as much as possible of the surplus labour in towns and cities.

Speaking at Winnipeg after a tour of western Canada, with E. W. Beatty, chairman and president of the Canadian Pacific Railway, General Sir Arthur Currie said he returned to the east "more proud, more confident of the country than ever before." Admitting that the times were uncertain and anxious, Sir Arthur urged that wealth, opportunity and resources be harnessed to the solution of nation-wide depression was "up to our men and women and I believe in the Canadian bread and the Canadian breed." As an instance of the creation of new wealth in Canada, he cited the Peace River country with which he had been proudly impressed.

Occupying the entire top floor of the Royal York Hotel, Toronto, Canada's most up-to-date radio studios were operated for the first time October 3 with the broadcasting of the Canadian Pacific Railway's "hour of cheerfulness and good music." It will operate a nation-wide radio broadcasting through the winter months.

How high can a fish climb? This is a question over which lovers of angling have often argued and debated. Many experts declare that 50 feet is the maximum for a fish to climb by means of a natural fishway. The Canadian Government Department of Fisheries in an official statement declares that fish in the Morsey River are climbing a fishway 59 feet high and "are making the climb up the river without difficulty."

Consumption of gasoline in Canada increased 54.9 per cent from 1920 to 1925 and in the same period the use of fuel and gas oils advanced 138 per cent. The use of motor cars, farm tractors and other agricultural machinery is given as the reason for the great increase in the use of gasoline and the growing popularity in the use of oil for heating purposes accounts for the advance in the consumption of fuel and gas oils.

An impressive march past of over 5,000 sockeye salmon was seen this summer at Stamp River Falls, B.C. The fish took from June 11 to July 29 to pass the falls by aid of the fishway constructed by the Canadian Government Department of Fisheries. A count of the fish was made at the falls during ten hours of each day in the six week period. As compared with the previous year there was a large increase, 9,551 against 5,512.

CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

CHAPTER II.—Continued.

Considering all it meant it was over in an incredibly few minutes, but during the entire time Gay did not look at Nick. She looked at Lincoln, not alone because his familiar visage steadied her, but because if she kept her eyes upon him she couldn't see Josiah K. Miller's beard.

Somehow she found herself shaking hands with the owner of the beard, and nodding dazedly to the clerk and the stenographer. Somehow, with the help of Nick's firm hand, she got down the dark stairway, and into the blinding sunshine of the spring day.

Still she didn't meet Nick's eyes. The whole performance had been a nightmare—a hideous travesty of sacred things. She was hurt and quivering. She glanced down at the gold band on her finger—wondered vaguely where Nick had got it, and realized at its sight that she was married—married without the touch of her husband's lips. The thought that not once during the whole day had Nick been anything but brotherly, suddenly scorched her. Surely, had he loved her ever so little, he would have kissed her! And to let her be married in that dreadful place...

Gay didn't know that her quick breathing was almost audible. She hardly knew that they were in the car again and had left the highway for a secluded street. She didn't notice that the car had stopped; but she

heard Nick say, a trifle hoarsely: "Gay—darling—if I'd known..."

And just when a voice broke in upon them: a high shrill, old-man voice: "By gorry! if ain't Nick Hastings!" They both stared, to behold a little man in baggy trousers and a wide-brimmed hat. He was carrying a huge umbrella, and looked to Gay like a character from Dickens; but Nick, beaming, stretched out a cordial hand.

"Why, hello, Mr. Bartlett! Aren't you a good way from home?"

"I be and I be!" was the enigmatic answer. "Truth is, I've moved since last you came. Couldn't stand the noise from that coal railroad; but no place is ever gold' to seem home to me; but the house where I lived with my old woman. This your lady, Nick?"

Nick grinned, and turned to Gay with the familiar light in his blue eyes again. "Gay, I want you to know Mr. Bartlett, a good friend of mine. This is my wife, Mr. Bartlett. I've been married since you saw me. We're taking a little trip."

The old man lowered his umbrella and squinted up at near-sighted eyes.

"Well, well, Pleasant time to be startin'. Some like fall, but I say, give me spring every time—spring an' apple blossoms. Ain't nothin' prettier where you namin' to put up over night?"

"We haven't made any plans. That is, we've started rather suddenly and—"

"I see, I see," interrupted Mr. Bartlett. "That's the way to do. That's the way we'd start out forty year ago, me and my old woman; only we went behind an old white horse. Say, why not use my camp?"

Nick started a minute. "You mean that bully little cabin on the hillside? The place I found you when I brought over that mortgage for you to sign?"

His voice was eager, and the old man beamed.

"That's it. Awful pretty place to stop. I was there yesterday—cleared her up—laid the fires—took up a lot o' canned goods, thinkin' maybe I'd be goin' to stay a day or so. May need a mite o' dustin', but gorry! so does the Central House! You're welcome to stay long as you want to, Nick, that is, if your wife'd like it."

"You would, wouldn't you, Gay?" asked Nick eagerly. "It's the suggest little place you ever saw, with a glorious view of the White Mountains from the porch. Of course, if you'd rather go to a hotel—"

"Well, that settles it!" interrupted the old man quickly. "Now if you'll take my umbrella (I had a sunstroke once, ma'am, and never travel without it), I'll hang onto the rumm'n' board and you can carry me back to the house—third from the corner, Nick, the white one, and I'll give you the key. No, ma'am, don't move. I like ride'n' on the rumm'n' board. Makes me feel like a boy. It's lucky I went up yesterday and aired her out. The red's all made, ma'am, and they've stry blankets in the chest. I'll give you a far o' milk and some eggs."

He continued to rattle on, planning for them as happily as if they had been his children. It was, perhaps, the best thing that could have happened to them at just that moment. It brought them back to a sane and normal world, after that torturing cere-

VICKS' VAPORUB
OVER 25 MILLION JARS USED YEARLY

mony in the offices of the Justice of the Peace. When they left, Mr. Bartlett waving a vigorous farewell from his front porch, they were themselves again.

"That old man does a lot of business with the bank," Nick explained when they turned a corner. "Rich as he is, and quite a character. Mr. Maxwell used to send me over to get his signature, and for some reason the old coddler took a fancy to me. Don't know why, except that I used to jolly him."

"The old man loved his umbrella and squinted up at near-sighted eyes. "I hope you'll like it the way I did! It may atone—"

He stopped abruptly, and drew her attention to some bloating violets. A silence fell upon them, but it was a silence of understanding, not constraint. Once, indeed, Nick lifted the hand that wore his ring, slipping it beneath his own upon the steering wheel; and that had brought Gay to a sense of security and well-being.

But they were children again when they explored the cabin. Nick declared that it was even more delightful than he remembered it; and insisted, with an anxious glance that brought color to Gay's cheeks, that the added charm was due to present circumstances.

"It's—perfect," she agreed.

They had finished their supper and stood together in the doorway, looking down through the pines that guarded their hearthstone, to where green woodlands bordered on greener meadows—where quiet lakes gleamed dully in the twilight, and mountains, blue and majestic, were silhouetted against the sky. The silence deepened. A star shone out—and then another. . . . Gay drew a tremulous breath.

"It's—like a bird in its nest."

Nick's arm went round her shoulders, drawing her closer.

"A bird in its nest," he echoed.

"Well—" He dropped the protecting arm, and faced her suddenly. "Gay—what has your thought of me all day? It came to me there in that abominable office, when—when you wouldn't look at me, that I hadn't behaved the way I should have. I suppose I was teasing myself a little. I didn't realize that I was teasing you as well. Do you remember when we were kids, Gay, and my mother'd sometimes take us on a picnic, how I always saved the choicest morsels for the last? I thought of that, that quality in my make-up, which kept me from kissing you today when I was tempted. I thought: 'I'll wait. Our first kiss shall be part of our wedding ceremony.'"

"Ceremony! In that horrible place! Oh, Gay, don't that quality that it hurts me as much as ever it hurt you? I thought: 'If only she'll look into my eyes I'll make her understand! But you didn't look, dear, and—of course I couldn't kiss you there! And when we got outside it was hard to speak. I was scared, honestly, scared of what you must be thinking—Gay—dearest—let's forget it, and—"

"Forget—our wedding?"

"Yes, if you call that miserable affair a wedding. I don't. I think it takes something more than a solemn Justice of the Peace, and the signatures of a gum-chewing girl and a vulgar little clerk, to make a marriage. God's a good enough witness for us, Gay; and I promise you—now that I'll love you—and honour you—and be true to you, dear, 'till death us do part."

His eyes met hers in a long and steadfast look.

Mutely, she stretched out her hands, and holding them in a warm clasp against his heart, Nick kissed her.

CHAPTER III.

A week later they were on their way, though strangely, it was Nick who protested at a change when Gay suggested that they had accepted Mr. Bartlett's hospitable long enough. She was seated on the ground beneath a pine tree, while the boy lay

at her feet, idly running the brown needles through his fingers.

"But I could stay here forever!" he exclaimed, and his regret at leaving "The Bird's Nest," as Gay had christened their first stopping place among the trees, was so apparent that the girl smiled.

"Forever?" she queried. "And what's to become of the ends of the earth you were seeking?"

He straightened up, looking at her with what she secretly called his "new look"—not the comrade-look she had grown up with, but something dearer.

"It sounds rather far away—the ends of the earth," he admitted. "I won't say that it doesn't call me, but in the last week I've discovered qualities I didn't know that I possessed. Perhaps I'm becoming tamed! If I'd had the sense to discover you before, Gay, we'd be living contentedly in my late uncle's house on Elm Street, and you'd be kissing me good-night each morning at eight-fifteen, when I started for the bank."

(To Be Continued.)

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. The Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says: "We have three fine, healthy children, to whom when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 35 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Riot Caused By Umbrellas

Indian Lord Castes Carried Them For a Day

A job lot of western umbrellas and shoes caused a riot on the Lacadive Islands, 150 miles off the Malabar coast. The Koyas, or aristocracy of the islands, long ago decreed—that they anyone might go ahead and carry umbrellas, but when the western shipment came in the Malumis, or sailor caste, and the Melacheris, who pick cocoanuts, decided to try dressing up. They picked 15 Melacheris and 15 Malumis to defy the old edict and it was a gala day for the strutting low castes until the Koyas' chief heard about it and ordered out his spearmen. After the fight the mannequins found themselves in jail.

HEAD HURT?

WORK won't wait for a headache to wear off. Don't look for sympathy at such times, but get some Aspirin. It never fails.

Don't be a chronic sufferer from headaches, or any other pain. See a doctor and get at the cause. Meantime, don't play martyr. There's always quick comfort in Aspirin. It never does any harm, isn't it foolish to suffer any needless pain? It may be only a simple headache, or it may be neuralgia or neuritis, Rheumatism. Lumbago, Aspirin is still the sensible thing to take. There is hardly any ache or pain these tablets can't relieve; they are a great comfort to women who suffer periodically; they are

DEPRESSION

"I'm a different woman"

"Two years ago I began to get depressed, and everything was too much trouble for me. I was a misery to myself and everyone around me. I was advised to take Glander Salts by my friends who said it was the same as Kruschen but it did me no good, so at last my husband got me a bottle of Kruschen and it did me. I have been taking Kruschen now constantly for two years. My daughter also would not be without it. I have got my neighbour to take Kruschen as well and she has found its worth as she feels a different woman."

(Mrs. G. A. K.) The commonest cause of depression is partial constipation—an insidious complaint because the sufferer is seldom aware of it. It means the gradual accumulation of body poisons which dull the mind, damp the spirits, sap the nervous strength and lower the whole vitality.

Kruschen Salts make constipation impossible. Therefore, if you keep to Kruschen you need never know the meaning of depression; never feel "nervy" or depressed.

Little Helps For This Week

"Whatsoever thy hand findeth to do, do it with thy might."—Ecclesiastes ix. 10.

So the work that's nearest. Though it's dull at times, Help us when we meet them. Lame dogs over stiles.

—Charles Kingsley.

Few are needed to do the out-of-the-way tasks which startle the world, and one may be most useful just doing common-place duties, and leaving the issue with God. And when it is all over, and our feet will no more, and our hands are helpless, and we have scarcely strength to murmur a last prayer, then we shall see that instead of needing a larger field we have left untill many corners of our single acre, and that none of it is fit for our Master's eye were it not for the softening shadow of the Cross.—George Macdonald.

Minard's Liniment has a hundred uses.

Up-Keep Is Expensive

Costs More To Run New York City Than Canada

The 1931 budget of New York City will mount to a new high record of at least \$32,400,000, a survey of New York's expenses, past, present and future, indicates.

This would amount to \$67,630,273 more than the budget for the current year and would be the greatest increase in the history of any city anywhere.

The entire governmental expense for the Dominion of Canada in 1929 was about \$281,400,000 in round figures, and the city budget that is expected in 1931.

always to be relied on for breaking up colds.

Buy the box that says Aspirin and has Genuine printed in red. Genuine Aspirin tablets do not depress the heart. All druggists.

Too much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms, such as headaches, gas, heartburn, etc., will disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you move out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine, prescribed by doctors for conditions due to excess acid. It is always a liquid; it cannot be made in tablet form. Look for the name Phillips' and the word genuine in red.

All Set for the Roarin' Game

'Tis only the matter of a few weeks now until the 'roarin' in' game is under way. In the odd quiet corner we hear some of last year's games being already discussed, and what this rink is going to do to 'other rink the coming season. "Oh, Boy!"

The Annual General Meeting takes place in the Town Hall, Friday, Oct. 24, at 8.30 p.m. All intending members and those interested are requested to attend, so that a full, representative meeting can be held.

We heard the other day that it is altogether likely that a rink from Spruce Grove will, this year, show the local boys how this game really should be played.

We wouldn't be surprised to see a battle with an Edson rink this year.

The best authorities state that the proper time to clean and prune brooms used in the preceding season is in the month of October. Only a limited number of these will be allowed on the rink this year.

Church Services.

Services in St. Philip's Church next Sunday, 11.30 a.m.

United Church service every Sunday Evg. at 7.30.

Open Seasons for Game

Following are open seasons for game—

Ducks and Geese—Sept 16 to Dec 14th.

Hungarian Partridge—Oct 1 to Nov. 14.

Prairie Chicken—Oct. 1-15.

Pheasant—No open season

Deer—Nov 1 to Dec 14

Otter, Nov. 1 to May 1.

Beaver, No Open Season.

Muskrat—Between North Sask. River and Tp. 91, March 15 to April 30

Game Licenses can be had at Sun Office, where copies of the Game Act can be seen.

Notice to Creditors and Claimants.

IN THE ESTATE OF EDWARD HOFFMAN, late of Stony Plain, Alberta, Farmer, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the Estate of the above named Edward Hoffman, who died on the 10th day of September, 1930, are required to file with the Solicitor for the Executors by the fifth day of December, 1930, a full statement duly verified of their claims and of any securities held by them, and that after that date the Executors will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which shall have been brought to their knowledge.

DATED at Stony Plain this 17th day of October, 1930.

JAS. MALLOCH,
Solicitor for the Executors.

Calendar.

OCTOBER—
21—Meeting of Carling Club.
24—Dance at Holborn.
28—Mechlenburg at Royal Hotel.
29—R. Larson's Auction Sale.
31—Dance at Moose Hall.
NOVEMBER—
6—Town Council meets.
7—Inga Councilors meet.
19—Thanksgiving Day.

The Imp Now at Jaspersen's

Mr Andrew Jaspersen, one of Stony Plain's best known and most prosperous farmers, has a new bull for service in the Burns bull ring of which he is the caretaker. Fairfield Imp, who was for some time in service in the Legal district, has been moved to Mr Jaspersen's dairy farm, north of town, and will be available for use by members of this bull ring.

Fairfield Island Imp is from the well known herd of Thos Law, of Chilliwack, B.C. He had already won four first prizes before he was a year old. His mother made a record of 407 pounds of butter fat as a 2 year old, and the dam of his sire is the holder of a record of 430 lbs. fat.

Holborn Happenings.

Mr Reuben Larson, the well-known farmer of Holborn district, is holding a clearance sale of stock, implements and household goods on Wednesday Oct. 29. It is understood that Reuben intends moving to Edmonton, and will probably engage in business in the Norwood district.

Mr John Kewley, the Holborn farmer who recently made a deal with Mr Philip Baron for the latter's four acre plot on Meridian road, has taken up his residence on the latter place.

An important item of 100 chickens which failed to appear on the Larson sale bill, will be offered by the auctioneer at that time.

Keen interest is being taken in the question as to whom the first prize will go for the best home made Hard Times costume worn tomorrow night at the big dance at Holborn Hall.

Bright Bank Briefs

Threshing was 90 per cent completed in this district when the big storm struck here last week.

Miss Irene Luckett is making good progress toward recovery from her recent indisposition.

Mr G Korman, our High School principal, had the misfortune of getting his foot run over by a threshing machine wheel while assisting John Kotscherofsky on the sand hills east of the school.

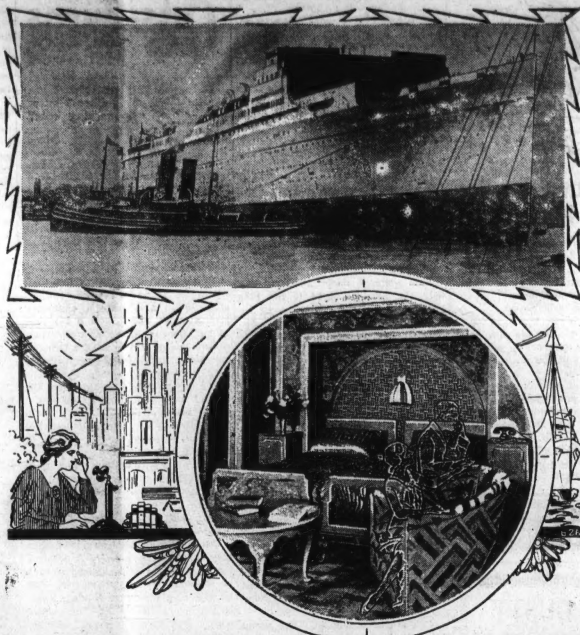

Mr Ed Zahn and family and Mr and Mrs H Litke made a motor trip to friends at Drayton Valley recently. They report having seen one moose and two bears, on the return trip.

Mr and Mrs C Hayworth of Edmonton were week end visitors with Mr and Mrs G Dickie.

Mr H Summerfield added a wild goose to his bill of fare last week.

Mr Archie McDonald is baling hay up at Duffield district for Roy Lent. He expects to make it a ten-day job on the Lent farm.

A Mid-Atlantic Hello

"Hello Mother. We're having a wonderful voyage, left Southampton day before yesterday and arrive Quebec day after tomorrow." The young man whose phantom outline shows in the picture of one of the deluxe apartments of the new Canadian Pacific liner Empress of Britain will be able, when the 42,000 ton ship enters service between Quebec and Southampton next June, to talk to anyone in Europe or the Americas for the first time in Canada's maritime history.

Above, a recent photograph shows the new liner nearing completion on the Clyde, and the telephone installation that will be a feature of every first class bedroom or apartment. Direct connection through the ship's switchboard with any land telephone will make calling Vancouver or Glasgow from mid-Atlantic just a matter of lifting the receiver and asking for the number. The Canadian Pacific announces that the wireless telephone will be so powerful that continuous touch will be maintained with both sides of the Atlantic.

The magnificent new Empress of Britain, 760 feet long, 27½ feet wide and with a speed of 24 knots, will bring Cherbourg, Southampton and Quebec more than a day closer.

First Photos Alaska-Montreal Telephone Link

The first telephone communication between Alaska and outside commercial lines took place a few days ago, when C. H. McLean, transmission Engineer of the British Columbia Telephone Co. and H. A. Robinson, Radio Engineer of the Northern Electric Co. Ltd., on board the Yacht "Belmont" in the harbour at Ketchikan, Alaska 960 miles north of Vancouver, B.C., put in a long distance call through Vancouver to Montreal and in a few minutes were carrying on a two way conversation with Major James Hamilton, Vice President and general manager B.C. Telephone and F. S. Sims, President Northern Electric Co. in the latter's office in the city Telephone Bldg. The conversation was overheard by a group of prominent citizens at both ends of the land lines which were "connected" to the Yacht by a new Radio Link developed entirely in Canada.

Pictures show, top left: H. A. Robinson and C. H. McLean with others in the operating room of the "Belmont". Right: The "Belmont" in Ketchikan Harbour. Lower left, F. S. Sims, President Northern Electric Co. looks on while Major James Hamilton, Vice President and general manager B.C. Telephone Co. talks to the Belmont. Right: Aerial view of Ketchikan Harbour. Inset, C. H. McLean, transmission Engineer B.C. Telephone.
